Medium-length
needles, full
shape, great
needle retention

Tree Species

SPRUCE
Great needle
retention,
prickly needles,
stiff branches

WHITE PINE
Long needles,
excellent needle
retention, full shape

What Does it Take to Grow a Tree?

Each spring we plant new seedlings to replace the previous year's harvest. We will then mow, till, mulch, weed, and shape each tree every summer for the next several years. After about 10 years the trees are then ready to be harvested!

...Ask us about a farm tour field trip
for your school or youth group...

We also invite you to visit the teepee on the hill.
The teepee is in honor of the local Native Americans who once had a village and ceremonial mounds on our farm. There will also be a re-enactor in the teepee during Thanksgiving weekend and the first weekend in December.

Environmental Stewardship

We strongly believe in the need to enjoy and protect our natural environment. We choose to operate our farm as sustainably and impact-free as possible. For example, we use mulch around each tree to limit the use of chemicals and irrigation. We also give financial contributions to numerous environmental causes..

Renewable, Sustainable, Recyclable

After Christmas please bring your tree back to the farm. We will then recycle it into wood chips. The chips will be used to mulch the new seedlings next spring.

Cut-Your-Own Trees

Why do you tag a limited number of trees? We tag a limited number each year. This process ensures that we have a steady supply for future years. Factors such as heat, drought, frost, and hail can alter the number of trees available to harvest each year. We plant more and more trees each year to help offset some of these factors.

Farm &
Field Map
On Back

Welcome to Krueger's Christmas Tree Farm!

...A family tradition for over 55 years...

Pre-Cut Trees

We have a great selection of pre-cut trees available. There are over 300 trees displayed in the sales area. There are also up to 40 trees in the heated tree barn. We have trees up to 17 feet tall. We sell several different species, including Balsam Fir, Fraser Fir, Canaan Fir, Scotch Pine, and White Pine, in addition to a limited amount of new exotic species.

Choose-and-Cut Trees

We also offer the option to cut your own tree. The field maps (on backside) indicate the locations and types of trees available. There will also be wagon rides that circle the fields.

You may walk to your tree and drag it back using one of our sleds or you may ride on the wagon. We also have saws and sleds available for you to use. Please note that for safety reasons we don't allow customer vehicles in the fields.

PLEASE CUT TAGGED TREES ONLY

If you have any questions or need help with a tree, please ask one of our crew in the red coats. We'll be glad to help!

Other Items For Sale

- Garland/Roping
- Tree Bags
- Red-Twigged Dogwood
- Hand-Decorated Wreaths
- Tree Watering Tools
- Swags

About the Farm

Our farm is a 4th generation Christmas tree farm. Our family has been farming this land for over 95 years. In fact, we will become a Century Farm in 2013. We have been supplying quality Christmas trees & great customer service to Twin Cities area families since 1955.

We are proud to have such a long history and future with this land. We have developed a deep connection and respect for the land, the environment, & the community.

Thank you for being a part of the farm! - **The Krueger Family**
